## New products & Palette

The developing of Sculptures Jeux products has as finality to create an equilibrated and harmonized link / relationship between the environment and how lives in this environment. The objects are not just simply things or forms in themselves, but come alive by entering in touch each other, with the surrounding space and with how lives in this space.

In this way we could see Sculptures Jeux not just as collection, but as a real family whereas the family representing a unit inside a massive reality. Thus the extra value gained during the time such as, made in Italy, the material quality and the attention on the details, could be shown on new and different way.

The main novelty of 2013 is the increasing of this family by introducing some new pieces on the collection, with different

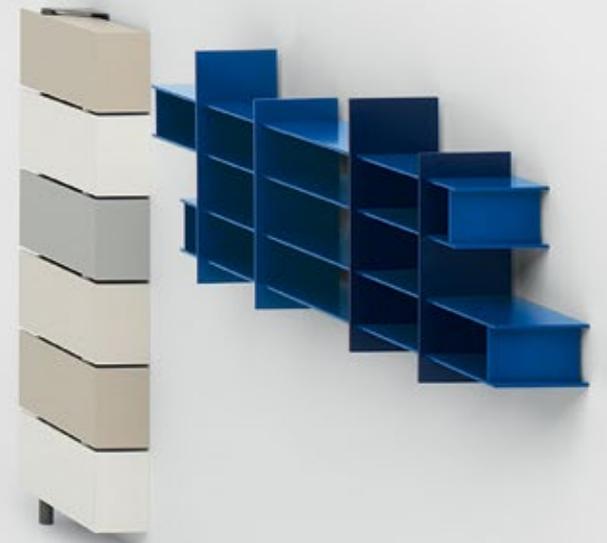

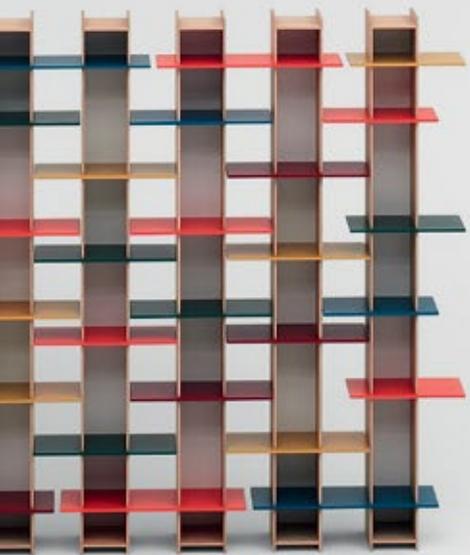

functionality but with the some philosophy. *Giralot*, is a versatile system with swivel 180° on the column, *Joint*, is a bookcase self-standing and composable, *Section*, elegant table that can be fix or extendable, and *Pico*, coffee table with round top: those new versatile and eclectic products introducing on the collection, extends the variety of Sculptures Jeux products on the living area.

Characterizes of the company philosophy

such as developing and researching, have brought up the attention to the colors themes. Inside the habitat space, the colors have a unique and fundamental part: interact and adapt vice versa with the other colors, creating an inside emotion feeling depending on how is combined with other colors. Sculptures Jeux on the 2013 will introduce new colors, but especially a *Palette* which is a combination of colors that creates a color theme.

Just to name a few: *Earth* is characterized by the warm and sand tonality which gives you a relaxing and pleased atmosphere. *Color* brings you toward the tropical land, where the light is very strong, intensive fragrance and the color are colorful. *Soft* is representing by some delicate colors and subtle tones. Every *Palette* can be utilized on the Sculptures Juex products, so you are able to create a link between different materials, forms, function.

In this way, thanks to the color theme, products are having a common thread and create a heterogenic harmonic feeling.
